### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species: there are five sets of species in this application; Species Set 1 represents the various direct contact array systems: species 1 is shown in Fig. 1, species 2 is shown in Fig. 16, species 3 is shown in Fig. 17, species 4-14 are shown in Figs. 50-60 respectively, species 15 is shown in Fig. 62, species 16-23 are shown in Figs. 65-73 respectively, species 24-28 are shown in Figs 78-82 respectively, species 29 is shown in Fig. 85, species 30 is shown in Fig. 86, species 31 is shown in Fig. 88 and species 32 is shown in Fig. 89; Species Set 2 is directed to the various cross sectional structures of a distribution member: species 1-5 are shown in Figs 2-6 respectively, species 6 is shown in Fig. 13; Species Set 3 relates to the array pattern of the orifices on a distribution member: species 1-6 are shown in Figs 7-12 respectively, species 7 is shown in Fig. 14, species 8 is shown in Fig. 15 and species 9 is shown in Fig. 92; Species Set 4 relates to the relationship and flow patterns between adjacent distribution members: species 1-10 are shown in Figs. 24-33 respectively; Species Set 5 relates to the various tube shapes and constructions: Species 1-14 are shown in Figs. 34-47 respectively. The species are independent or distinct because as disclosed the different species have materially different designs, functions and effects and are not capable of use together.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each of the noted Species Sets for prosecution on the merits to which the claims

shall be restricted if no generic claim is finally held to be allowable. Each of the elected species should be capable of and disclosed as usable together. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.  
MPEP § 809.02(a).

The examiner notes that he has made a good faith effort to properly divide and define the various species of invention. However, due to the excessive number of disclosed species and embodiments further restriction maybe required.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles G. Freay whose telephone number is 571-272-4827. The examiner can normally be reached on Monday through Friday 8:30 A.M. to 5:30 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ehud Gartenberg can be reached on 571-272-4828. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
